## **Cardiac Dimensions® Fact Sheet**

- Established:** Cardiac Dimensions was founded in 2001 and has offices in Sydney, Australia, Kirkland, Washington and Frankfurt, Germany. It is a privately owned company backed by top tier venture investors including Lumira Capital, M. H. Carnegie & Co., Arboretum Ventures, Life Sciences Partners and Aperture Venture Partners.
- Mission:** To provide customer-valued solutions with the ideal combination of efficacy, simplicity and safety, establishing Cardiac Dimensions' technologies as first line therapies for heart failure patients.
- Overview:** Cardiac Dimensions is a medical device company that has developed the only right-sided, minimally-invasive product designed to specifically to treat FMR. The company's novel interventional technology is designed to address the unmet needs of heart failure patients and the related condition of mitral valve regurgitation.

### **Cardiac Dimensions Product Portfolio**

#### **Commercially Available (in Europe and the Middle East):**

**The Carillon® Mitral Contour System®** The Carillon® Mitral Contour System® is a permanent implant developed for the treatment of functional mitral regurgitation. The implant is placed using a non-surgical (catheter-based) technique in a vein on the outside of the heart which lies adjacent to the mitral valve. This minimally-invasive, simple procedure is designed to reshape the annulus of the mitral valve, and thus reduce mitral regurgitation. The Carillon Mitral Contour System has received CE Mark approval and is available for sale in the European Union. The Carillon Mitral Contour System is not approved for use in the United States.

**Employees:** 45+

5540 Lake Washington Blvd. NE

**Primary Mailing Address:** Kirkland, WA 98033  
**Phone:** (425) 605-5900  
**Fax:** (425) 605-5901
